PROFESSIONAL SUMMARY

Aspiring data analyst pursuing a Bachelor of Information Technology with demonstrated proficiency in **analytical skills** and **dashboard creation** using Tableau. Achieved **Dean List** award from Kulliyyah for all seven semesters during study. Seeking to secure an **internship** in the data analytics field to contribute skills and knowledge while furthering development within this industry.

PROJECTS

SwitchAR: AR Virtual Switch Control For IoT-based Smart Home Automation 2023

Related Skills: Arduino, Unity, Blynk, Vuforia

- Developed a mobile base application that implements the concept of IoT and Augmented Reality to control home appliances.
- Achievement: Achieved 1st place in the System Development category for the Final Year Project, awarded by the Department of KICT.

Covid-19 Data Cleaning

Related Skills: SQL, Microsoft Excel, SQL Server Management Studio

- Self-learned project data cleaning basics using SQL Server through a YouTube course.
- Utilized data sourced from <https://ourworldindata.org/covid-deaths> to clean and transform raw data into a structured format suitable for visualization purposes.

Crime Dataset Analysis 2023

Related Skills: Tableau Software, Microsoft Excel

- Lead a team of 4 people to create a storyboard using tableau to analyze the crimes in Malaysia from 2015 until 2020.
- Experienced in building dashboards and storyboards as part of group projects.
- Datasets analyzed were obtained from Malaysian Open Data Portal at <https://data.gov.my>.
- Achievement: created an interactive and working storyboard.

IIUM E-summons (December 2020 -January 2021)

Related Skills: PhpMyAdmin, PHP, SQL, HTML, CSS, Database Programming

- Contributed to a team project developing a system to streamline student summons management for officers.
- The system only consists of a simple Retrieve and Delete process for users to pay their summons.
