LinkedIn: [www.linkedin.com/in/muhammad-amir-hamzah](https://www.linkedin.com/in/muhammad-amir-hamzah) | Portfolio: <https://amoiir.github.io>

## PROFESSIONAL SUMMARY

First-Class Honours IT graduate specializing in Business Intelligence & Analytics, and **2<sup>nd</sup> runner-up** at the Gamuda AI Academy. Highly skilled in full-stack AI implementation, including mobile development (React Ionic), backend APIs (Python), and LLM/RAG integration. Recipient of the Dean’s List Award for 4 consecutive years. Seeking an entry-level **Software Development Engineer** role to build production-ready AI applications. **Available immediately.**

## EDUCATIONAL BACKGROUND

|                                                                                                  |                                        |
|--------------------------------------------------------------------------------------------------|----------------------------------------|
| <b>Gamuda AI Academy, Selangor</b>                                                               | <b>(January 2026 – March 2026)</b>     |
| Full-stack AI Software Developer Apprentice                                                      | Result: Top 3 among 8 groups           |
| <b>International Islamic University Malaysia, Kuala Lumpur</b>                                   | <b>(November 2020 – November 2024)</b> |
| Bachelors in Information Technology specialized in Business Intelligence and Analytics (Honours) | CGPA:3.75/4.00                         |

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                    |

| <ul style="list-style-type: none"><li>Owned and maintained SSIS pipelines, automating Oracle-to-SQL Server ETL processes, ensuring accurate and reliable data integration across systems.</li><li>Achieved transfer of 1.9M rows within 3 days, demonstrating ability to optimize ETL workflows for timely data delivery.</li><li>Designed and implemented Master Data Services (MDS) to centralize enterprise data across multiple Perodua group companies, establishing a single source of truth across the Perodua environment.</li></ul> |                                    |

- Enhanced data quality and integrity by configuring domain rules, business rules, and using Data Quality Services (DQS) for cleansing, matching, and enrichment processes in preparation for analytics initiatives.
- Optimized ETL by configuring SQL Server Agent to schedule SSIS packages, automating daily Oracle-to-SQL Server data loads and eliminating manual intervention.

WAHDAH Technologies, Melaka

(March 2024 – August 2024)

Android Programmer (University Internship)

- Developed key Android app features using Kotlin, MVVM architecture, and Android SDK components to enhance user experience and improve app functionality.

ACHIEVEMENTS

- 2<sup>nd</sup> Runner up, Gamuda AI Academy. (2026)
- Dean’s List recipient (8 out of 8 semester), University level. (2024)
- Malaysia Data Innovation Talent 2023, National Level, Top 50 among 120 groups. (2023)

RESEARCH PROJECT

Airis: Camera First Language Learning Application

(2026)

- Secured Top 3 Best Project among 8 groups, with recognition for excellence in image processing as the application's core feature.
- Architected and developed a cross-platform mobile application utilizing React Ionic, integrating advanced image processing capabilities as the core feature.
- Integrated the Gemini API to handle image-to-text processing, converting mobile camera frames into dynamic language-learning prompts.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline using Python (FastAPI) and an LLM framework to power a contextual chatbot, increasing response relevancy and reducing hallucinations.

Final Year Project, SwitchAR, AR Virtual Switch Control for IoT-Based Smart Home Automation.

(2024)

- A partnered Final Year Project aimed at helping the elderly become more independent with home appliances.
- Proposed and developed a mobile application using Flutter and Unity application that incorporates IoT and AR concepts, providing a modern solution that helps elderly interact with home appliances with ease.

SKILLS

- **AI & Data Engineering:** Generative AI, Large Language Models (LLMs), Agentic AI, RAG, Prompt Engineering, ETL Processes, Alteryx, Data Modelling & Cleaning
- **Programming Languages:** Python, SQL, Kotlin, Dart, JavaScript, Java, C++, PHP
- **Frameworks & Web Development:** React.js, Ionic, FastAPI, Axios, REST APIs, HTML/CSS
- **Databases & Cloud Platforms:** PostgreSQL, MySQL, Microsoft SQL Server, Firestore, MongoDB, Firebase
- **Tools & Analytics:** Power BI, Tableau, Advanced Excel (Pivot Tables, Dashboards), Postman, Git, GitHub, GitLab
- **Languages:** Bahasa Malaysia (Native), English (Intermediate), Arabic (Beginner)
