PROFESSIONAL SUMMARY

First-Class Honours IT graduate specializing in Business Intelligence & Analytics, and **2nd runner-up** from the Gamuda AI Academy. Highly skilled in full-stack AI implementation, including mobile development (React Ionic), backend APIs (Python), and LLM/RAG integration. Recipient of the Dean’s List Award for **4 consecutive years**. Seeking an entry-level **Software Development Engineer** role to build production-ready AI applications. **Available to start as early as August 1st, 2026.**

EDUCATIONAL BACKGROUND

Gamuda AI Academy, Selangor	(January 2026 – March 2026)
Full-stack AI Software Developer Apprentice	Result: Top 3 among 8 groups
International Islamic University Malaysia, Kuala Lumpur	(November 2020 – November 2024)
Bachelors in Information Technology specialized in Business Intelligence and Analytics (Honours)	CGPA:3.75/4.00

WORK EXPERIENCE

Gamuda Berhad, Selangor	(May 2026 – Present)
<i>AI Automation Engineer (Personal Internship)</i>	
Migration to Google Workspace & Centralized Dashboard	
- Spearheaded the migration of 100+ siloed Excel project files into a centralized Google Workspace ecosystem using Google Apps Script. - Architected an automated dashboard via Google Apps Script within one month, providing senior management with real-time operational data.	
Intelligent File Management System (GenAI Integration)	
- Independently leading the R&D and architecture of a cloud-native file management platform, writing custom Google Apps Script and utilizing the Google Drive API to map complex enterprise directory structures. - Driving the ongoing integration of GCP and GenAI features, independently testing the Gemini API framework to automate data extraction and deliver semantic project summaries for Gamuda Capital.	
Perodua Sdn. Bhd., Selangor	(April 2025 – October 2025)
<i>System Engineer (Big Data & Digitalization)</i>	
- Owned and maintained SSIS pipelines, automating Oracle-to-SQL Server ETL processes, ensuring accurate and reliable data integration across systems. - Achieved transfer of 1.9M rows within 3 days, demonstrating ability to optimize ETL workflows for timely data delivery. - Designed and implemented Master Data Services (MDS) to centralize enterprise data across multiple Perodua group companies, establishing a single source of truth across the Perodua environment.	

- Enhanced data quality and integrity by configuring domain rules, business rules, and using Data Quality Services (DQS) for cleansing, matching, and enrichment processes in preparation for analytics initiatives.
- Optimized ETL by configuring SQL Server Agent to schedule SSIS packages, automating daily Oracle-to-SQL Server data loads and eliminating manual intervention.

WAHDAH Technologies, Melaka

(March 2024 – August 2024)

Android Programmer (University Internship)

- Developed key Android app features using Kotlin, MVVM architecture, and Android SDK components to enhance user experience and improve app functionality.

ACHIEVEMENTS

- 2nd Runner up, Gamuda AI Academy. (2026)
- Dean’s List recipient (8 out of 8 semester), University level. (2024)
- Malaysia Data Innovation Talent 2023, National Level, Top 50 among 120 groups. (2023)

RESEARCH PROJECT

Airis: Camera First Language Learning Application

(2026)

- Secured Top 3 Best Project among 8 groups, with recognition for excellence in image processing as the application's core feature.
- Architected and developed a cross-platform mobile application utilizing React Ionic, integrating advanced image processing capabilities as the core feature.
- Integrated the Gemini API to handle image-to-text processing, converting mobile camera frames into dynamic language-learning prompts.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline using Python (FastAPI) and an LLM framework to power a contextual chatbot, increasing response relevancy and reducing hallucinations.

Final Year Project, SwitchAR, AR Virtual Switch Control for IoT-Based Smart Home Automation.

(2024)

- A partnered Final Year Project aimed at helping the elderly become more independent with home appliances.
- Proposed and developed a mobile application using Flutter and Unity application that incorporates IoT and AR concepts, providing a modern solution that helps elderly interact with home appliances with ease.

SKILLS

- **AI & Data Engineering:** Generative AI, Large Language Models (LLMs), Agentic AI, RAG, Prompt Engineering, ETL Processes, Alteryx, Data Modelling & Cleaning
- **Programming Languages:** Python, SQL, Kotlin, Dart, JavaScript, Java, C++, PHP
- **Frameworks & Web Development:** React.js, Ionic, FastAPI, Axios, REST APIs, HTML/CSS
- **Databases & Cloud Platforms:** PostgreSQL, MySQL, Microsoft SQL Server, Firestore, MongoDB, Firebase
- **Tools & Analytics:** Power BI, Tableau, Advanced Excel (Pivot Tables, Dashboards), Postman, Git, GitHub, GitLab
- **Languages:** Bahasa Malaysia (Native), English (Intermediate), Arabic (Beginner)
